		Art Unit: 2834					

The proposed amendment, filed on 8/12/02, raises the following new issues:

- (1) In claim 18, the recitations of a closed circuit (in light of the spec, it is understood as a coolant circulation closed circuit) is proposed to be deleted and replaced by newly added limitations of the heat dissipation device is an independent structure relative to the casing. This raises new issue about the structural relationship of heat dissipation device with respect to the casing.
- (2) in claim 21, newly added limitations of a separate gas pump. This raises new issue about an additional component, i.e., a separate pump, in the closed coolant circulation structure.

These new issues would require new consideration and new search. Therefore the proposed amendment will not be entered.
